Hi April

I understand that we are now in a 'final' consultation stage of the NDP.

I trust that I am right in thinking that an NDP is a long term guidance planning document. I have not been able to access the following projected figures that must impact upon any future hopes and aspirations.

What is the capacity of our local schools pre, primary, secondary and tertiary and what are their projected figures for the next 10 years.?

What is the capacity of our medical centre? How many use it from outside the NDP radius?

I have yet to see any evidence that our NDP has shared objectives with our neighbours.

I have no idea of what the present unemployment levels are, what the skills deficit are, and what projections suggest. Can You help? Where can I find the info why is it not in our NDP?

I understand that a significant employer - Townsend Nursing Home - is to close. What impact does the Town Council envisage this will have on unemployment rates, care for/in the community. opportunities for new housing + expansion of the Vantage 55 housing and the impact that might have on traffic flow. How much asbestos is there on the present site? What access to the site for future development is the Council recommending to the powers that be?

Sorry April

Just annoyed but probably more caring than annoyed.

Mike Steward
