1 Introduction

1.1 This Infrastructure Funding Statement is created to address requirements included within Paragraph 175 of the National Planning Practice Guidance which states:

For the financial year 2019/2020 onwards any local authority that has received developer contributions (section 106 planning obligations or Community Infrastructure Levy) must publish online an infrastructure funding statement by 31 December 2020 an by the 31 December each year thereafter. Infrastructure funding statements must cover the previous financial year from 1 April to 31 March (note this is different to the tax year which runs from 6 April to 5 April).

1.2 Paragraph 176 states the information which needs to be included within the statement:

Infrastructure funding statements must set out:

- A report relating to the previous financial year on the Community Infrastructure Levy;
- A report relating to the previous financial year on section 106 planning obligations;
- A report on the infrastructure projects or the types of infrastructure that the authority intends to fund wholly or partly by the levy (excluding neighbourhood portion).

The infrastructure funding statement must set out the amount of levy or planning obligation expenditure where funds have been allocated. Allocated means a decision has been made by the local authority to commit funds to a particular item of infrastructure or project.

It is recommended that authorities report on the delivery and provision of infrastructure, where they are able to do so. This will give communities a better understanding of how developer contributions have been used to deliver infrastructure in their area.

The infrastructure funding statement must also set out the amount of levy applied to repay money borrowed, applied to administrative expenses, passed to other bodies, and retained by the local authority. Local authorities will need to choose when to report money passed to other bodies in an infrastructure funding statement, depending on how the date the money was transferred on relates to the date of reporting.

Authorities can also report on contributions (monetary or direct provision) received through section 278 highways agreements in infrastructure funding statements, to further improve transparency for communities.

1. Introduction

It is recommended that authorities report on estimated future income from developer contributions, where they are able to do so. This will give communities a better understanding of how infrastructure may be funded in the future.

It is acknowledged that data on developer contributions is imperfect, represents estimates at a given point in time, and can be subject to change. However, the data published should be the most robust available at the time.

1.3 Additionally Paragraph 177 outlines that the statement must also state the following:

The infrastructure funding statement should set out future spending priorities on infrastructure and affordable housing in line with up-to-date or emerging plan policies. This should provide clarity and transparency for communities and developers on the infrastructure and affordable housing that is expected to be delivered. Infrastructure funding statements should set out the infrastructure projects or types of infrastructure that the authority intends to fund, either wholly or partly, by the levy or planning obligations. This will not dictate how funds must be spent but will set out the local authority's intentions.

This should be in the form of a written narrative that demonstrates how developer contributions will be used to deliver relevant strategic policies in the plan, including any infrastructure projects or types of infrastructure that will be delivered, when, and where.

- **1.4** Paragraph 179 defines infrastructure to include the following developer contributions:
- Affordable housing
- Education (Primary, Secondary, Post-16 and Other)
- Health
- Highways
- Transport and travel
- Open space and leisure

- Digital Infrastructure
- Green Infrastructure
- Flood and water management
- Economic development
- Land
- Section 106 monitoring fees
- Bonds (held or repaid to developers)
- Other
- Neighbourhood CIL
- Mayoral CIL

Section 106 Planning Obligations

Planning obligations are legal obligations which are entered to mitigate the impact of a development proposal. These are entered through Section 106 of the Town and country Planning Act 1990.

- **2.1** Obligations which are sought must be:
- Necessary to make the development acceptable in planning terms;
- Directly related to the development; and
- Fairly and reasonably related in scale and kind to the development.
- **2.2** Contributions are provided on site through the provision of affordable housing or LEAPs or off site in the form of a financial payment(s).

Community Infrastructure Levy (CIL)

- **2.3** Another form of obligation is CIL. These fund more general strategic infrastructure requirements. Financial contributions are secured from developers on certain developers then the funds are used to provide, improve, replace, operate or maintain infrastructure in the area.
- **2.4** The district currently does not operate CIL therefore this is not included within the statement.

Assumptions

- 3.1 In order to create this statement the following assumptions have been made:
- Each Section 106 agreement is different. To produce a useful summary of the agreements similar contributions have been grouped together
- Affordable housing requirements that have been expressed as a percentage within the agreement have been calculated as units based upon the proposed number of units within the development
- Outline planning permissions generally do not indicate the final amount of development. In some instances the number of dwellings are not specified within the decision, and may subsequently be varied. Indicative numbers may however be referred to in the design and access statement or other application documents. For outline applications the amount of development, and the number of affordable housing units, are therefore often indicative.
- In some instances a contribution is expressed as a monetary contribution per dwelling within the Section 106 agreement. The figures for these contributions are based upon the contribution required per dwelling and the number of dwellings proposed. These figures are therefore also indicative.

Methodology

- 3.2 The following methodology has been used to collect the required information.
- A list of closed and active Section 106 agreements were obtained from CAPS system. Section 106 agreements categorised on the CAPS system as ACTIVE and CLOSED were reviewed to address this. Those categorised as NOFURT (no further action) SUPERC (superseded), NEGOLA or DROP were not reviewed.
- Contributions were grouped into categories
- Contributions relating to administration, bonds, planning and management or legal costs, which did not result in a planning gain, were not included in the review
- Details of each Section 106 agreement: The CAPS system relies on manually inputted data and there is the potential for inaccuracies. The original documentation was referred to if the details were unclear on the CAPS system

3 . S106 Contributions

- Information from the Accountancy Department was also utilised to ensure accuracy is regards to payments received and spent.
- Any duplicates noted on the CAPS system were omitted.
- **3.3** The contributions are categorised as follows:
- Affordable housing units: In some instances, the number of affordable units required are specified in the section 106 agreement. For the purposes of this review, affordable housing contributions expressed as a percentage were calculated to provide an indicative figure.
- Non numeric contributions: For example, the provision of a play space, open space, the transfer of land to the local authority or other public bodies, the direct provision of infrastructure, footpaths, highways improvements, facilities, etc.
- Monetary contributions: These are categorised as affordable housing, youth/recreation, play space/open space, transport (including sustainable and community transport), library services, education, community/health, footpaths, drainage, parking or other (any other contributions excluding legal and administrative charges
